PROJECTS

C-DAC PROJECT :

Title - Vaccination Notifier System

Duration - 1 Month

Platform - J2EE, MySQL, React JS

Description :

- Vaccination Notifier System aims to provide parents with timely reminders and updates regarding their child vaccination schedule. Parents can register their child details and receive notifications via email or SMS for upcoming vaccination. The system utilises MySQL for efficient data storage and retrieval. React ensures user friendly interface. Advance java handles the back end functionalities including data processing ,validation and integration with the notification system.

DEGREE PROJECT :

Title : Design And Fabrication Of
Potato Peeling Machine

Duration : 6 Months

Description :

- The main objective of a Potato Peeling Machine is to automate and streamline the process of removing the outer skin or peel from potatoes. It increases the efficiency by reducing the time, reduces labour costs and also reduces the waste of potatoes, and improving food preparation in commercial kitchens and food processing facilities.
